# 1.2 Module aims and objectives

This module builds on the concepts, conventions and principles introduced in the Financial Accounting, Financial Accounting and Analysis and International Financial Reporting modules at stages 1 and 2 of the programme.

The module aims to develop learner knowledge and skills in understanding and applying accounting standards, and the theoretical framework involved in the preparation of financial statements for single business entities.

#### 1.3 Minimum intended module learning outcomes

On successful completion of this module, learners are able to:

- (i) Evaluate the international regulatory and conceptual financial reporting framework
- (ii) Appraise the objectives of financial statements and the qualitative characteristics of financial statements
- (iii) Understand the main similarities and differences between the regulatory and legal frameworks for international and local Generally Accepted Accounting Practice (GAAP)
- (iv) Interpret and apply International Financial Reporting Standards and interpretations adopted by the International Accounting Standards Board (IASB) to various business transactions including disclosure requirements
- (v) Prepare the financial statements for single incorporated entities in accordance with International Financial Reporting Standards
- (vi) Analyse current developments within the accounting profession

### 1.4 Rationale for inclusion of the module in the programme

International Corporate Reporting (ICR) develops learners' knowledge and skills in understanding and applying accounting standards, and the theoretical framework involved in the preparation of financial statements of limited liability entities both private and public. The ICR module explores both international and local standards to develop the learners' understanding of different

accounting environments. It prepares the learner for the accounting environment and equips them with the skills necessary to understand and apply knowledge in the workplace.

### 1.5 Information provided to learners about the module

Learners enrolled on this module initially receive a copy of the module descriptor, assessment briefs and assessment strategy. These materials are given directly by the lecturer but also by the year head as part of the Semester Schedule Handbook for award stage modules of the programme. All content is provided on Moodle as well as access to additional content through the library and online resources.

#### 1.7 Module teaching and learning (including formative assessment) strategy

The module is delivered through a series of classroom lectures supported by tutorials. Learners are provided with a clear week by week guide of the module activities and lecture content. The classroom lectures are recorded and made available to learners to enhance their understanding and provide

revision material. Quizzes via the Moodle platform are used as formative assessment tools. The module is designed to prepare the learners for the final, closed-book exam at the end of the module. Past examination papers with suggested solutions for in-class and independent practice are provided to ensure the learner has a clear understanding of the exam standard required to perform well in the final exam.

#### 1.8 Work-based learning and practice-placement

There is no work-based learning or practice-placement within this module.

#### 1.9 E-learning

Moodle is the College's virtual learning environment (VLE) from which learners are able to access all materials. These include class notes, reading materials, videos and case studies. Online classes and seminars are provided for learners undertaking the 'Blended Learning' courses.

# 1.10 Module physical resource requirements

The module requires a fully equipped classroom for lectures, with capacity to hold at least 100 learners, including projection and video recording capability, internet access and presentation software, and tutorial rooms to accommodate 25 learners. Online broadcasting and recording capability to stream and store lectures is also required.

For each instance of the module, one lecturer must be qualified to at least master's level in accounting, finance or business equivalent and/or possess an equivalent professional accounting / finance qualification.

# 1.13 Module summative assessment strategy

Initial summative assessment is conducted by way of individual coursework which enables learners to apply the skills and knowledge of the terminology and concepts presented in lectures. Assessment strategies include the preparation, interpretation and discussion of accounting standards and financial statements presented in essay and / or report format. 20% of the marks are allocated to this piece of work.

The remaining 80% is allocated to an end-of-semester, closed-book examination which requires learners to complete questions containing both theory and practical elements.
